JOIN THE RESISTANCE!

Marxism 93 takes place in a turbulent world.

Epidemic, starvation and civil war drag millions into turmoil, some barely survive while others now fight those who were previously their neighbours.

The hopes that flourished in eastern Europe at the end of the 1980s have slipped into civil war in Yugoslavia.

And in the west the spectre of racism and fascism stalks the political horizon.

In Ireland a tight-fisted coalition government presides over mass unemployment and poverty—whilst in the North loyalist violence is on the rise.

But there can be an alternative—arising out of the struggles of workers all around the world.

But no struggle can be successful without a strategy.

And no strategy can be forged unless we understand the lessons of past struggles and the way society works today.

Marxism 93 provides a unique forum from which we can learn, discuss and debate about our rich past , and from which we organise for the resistance that lies ahead.
